ANNUAL REPORT
SPDA
2017

SPDA

The year 2017 allowed SPDA to make progress and consolidate work on priority areas towards sustainable development including access to environmental justice, indigenous rights, natural heritage and biodiversity, forest and marine governance and strengthening environmental management practices.

SPDA is also proud to have initiated coordinated actions with state agencies, judicial authorities and the Public Ministry, international organizations and civil society, on key issues such as sustainable fishing, water governance and the defense of environmental rights.

OUR WORK

KEY ACCOMPLISHMENTS

ANNUAL REPORT
SPDA
2017

INDIGENOUS PEOPLES AND TERRITORIES

In coordination with the Native Federation of the Madre de Dios River and its Tributaries (FENAMAD) and the Madre de Dios Regional Government, SPDA implemented a pilot project that allowed us to work together with 5 native communities on solving problems regarding physical and legal tenure of their territories.

Thanks to the achievements of this pilot project, presented as a success story by Rights and Resources Initiative (RRI), since 2017 SPDA leads the first project of the International Land and Forest Tenure Facility, whose objective is to reach greater legal certainty for indigenous territories in the country. The scope is national, with an emphasis in Madre de Dios and Loreto.

In 2017 we worked together with several civil society organizations and indigenous organizations, on a legal, technical and communicational strategy to confront threats caused by infrastructure (mostly road) projects within the territories of indigenous peoples in isolation and initial contact (PIACI) in Peru.

SPDA also supported the physical and legal entitlement of

112800

hectares of indigenous territories.

Land ownership was awarded to

03

communities.

The creation of the

1st **multisectoral group at the Congress of the Republic** for the protection of PIACI was promoted and coordinated.

SPDA is a member of the Regional Working Group on **Indigenous Policies of the Regional Government of Ucayali.**

STRENGTHENING ENVIRONMENTAL MANAGEMENT

AND CONFRONTING CLIMATE CHANGE

During 2017 SPDA continued to support different public actors, including the Congress of the Republic, in the design of legal norms and tools needed for adequate economic and environmental development. SPDA´s team participated actively in debates on and support for the draft Framework Law on Climate Change.

We developed a detailed scoping analysis regarding the situation of environmental certification and assessment processes, and the capacities of public entities responsible for these.

Capacity building on Environmental Law for professionals and university students who will someday contribute towards appropriate operations of environmental institutional frameworks.

20 **Reviewed legislative** and regulatory initiatives.

In depth assessment:
49 interviews undertaken in 10 regions.

15 **students graduated** from SPDA´s XVI Workshop on Environmental Law.

02 legal proposals on environmental certification and assessment.

18 **professionals graduated** from the Program of Second Speciality in Environmental Law and Natural Resources, organized with the PUCP.

STRENGTHENING ENVIRONMENTAL MANAGEMENT AND CONFRONTING CLIMATE CHANGE

PHOTO **Thomas Muller**

NATURAL HERITAGE AND BIODIVERSITY

SPDA has focused on the design of alternatives to achieve financial sustainability for conservation actions at the national level, based on extensive research work and legal-technical analysis undertaken by a team of lawyers and economists.

Research has been undertaken on the relationship between natural protected areas (NPAs) and climate change, the conservation of agrobiodiversity and plant genetic resources, and the role of technology in the implementation of policies on genetic resources.

The Tambopata National Reserve Management Committee´s trust fund was registered to ensure funding in favor of the Reserve and buffer zones. It was also recognized as an institution exonerated from income taxation in Peru.

We have worked closely with the Regional Government of Loreto in strengthening conservation tools and actions such as the Loreto Regional Strategy for Wetlands, the Loreto Regional Conservation System, and the development of a legal instrument to Recognize Local Monitoring Organizations in Regional Conservation Areas (RCAs) and proposals for the establishment of new regional conservation areas. Additionally, we participated in the establishment of two new natural protected areas: the Tres Cañones Regional Conservation Area and Yaguas National Park.

+40

Innovative mechanisms to finance biodiversity conservation in Peru.

20

Reviewed legal and regulatory drafts and elaboration of the first Regulatory Impact Analysis on an environmental draft law in Peru.

+300

Training for experts and authorities on NPAs, indigenous peoples, rural land, actions against illegal activities, tourism, control and monitoring of marine spaces, inclusive finances, among others.

Registration in the Public Registry of the

1er Tambopata National Reserve Management Committee´s trust fund.

NATURAL HERITAGE AND BIODIVERSITY

FOREST AND WILDLIFE GOVERNANCE

During 2017, SPDA´s team joined a multisectoral group formed by the Ministry of Environment (MINAM) and Ministry of Agriculture and Irrigation (MINAGRI), to prepare a draft procedure for MINAMs prior opinion in changes in land use administrative procedures and for the development of a draft to update the Regulation on Land Use Capacity Classification.

We supported the Regional Government of Loreto in its forest zoning process and provided legal assistance to those affected by deforestation in Tamshiyacu. SPDA has conducted several courses and workshops in Loreto and Madre de Dios, on deforestation, change of land use and forest legislation.

SPDA also participated with partners such as the Wildlife Conservation Society (WCS), in the elaboration and systematization of the National Strategy to Reduce Illegal Wildlife Trafficking in Peru (2017 – 2027) and Plan of Action (2017 – 2022), published by means of Supreme Decree No. 011-2017-MINAGRI. Through ActualidadAmbiental.pe and communication campaigns, SPDA has disseminated information to contribute to raise awareness among citizens on these issues.

We promoted the development of

02

draft legislation to strengthen forestry management.

ENVIRONMENTAL JUSTICE

SPDA promoted the Madre de Dios Pact for Environmental Justice in Peru, led by the Judiciary Branch. Additionally as part of the agreement signed with the Judiciary Branch, we provided support in organizing the 1st International Congress on Environmental Justice in Madre de Dios and creating the first environmental courthouse in the same region.

We installed a new Free Legal Clinic in Piura, which adds to SPDA´s Madre de Dios and Loreto clinics. The three clinics focus on handling legal cases and consultations linked to environmental violations, providing training for forest users, indigenous peoples, artisan fishermen and authorities.

The Environmental Alert Platform that monitors environmental complaints in Madre de Dios and in the Tambopata National Reserve buffer zone, expanded its scope to 3 new areas of work: the Madre de Dios nut growing zone, the shoreline and coastal zones of Piura (Environmental Alert for the Seas of Peru) and legal initiatives (draft projects by the Congress of the Republic).

SPDA participated actively in the dissemination of the rights to information, participation and environmental justice, particularly in discussions on the Regional Agreement on Principle 10 of the Rio Declaration. We participated in a regional meeting where the threats and challenges faced by environmental human rights defenders in Latina America were analyzed. The event was convened by professor John Knox, Special Rapporteur of the United Nations on human rights and various environmental organizations. SPDA presented the situation of the Madre de Dios environmental human rights defenders.

The Madre de Dios Pact for Environmental Justice in Peru had more than

100

signatures.
It was submitted to Pope Francis in January 2018.

Some of the following organizations and institutions expressed their support:
Judiciary Branch,
Public Ministry,
Ministry of Environment,
Ministry of Agriculture and Irrigation,
AIDESEP,
Tambopata National Reserve Management Committee,
FENAMAD,
OSINFOR,
OEFA,
among others.

SPDAs Free Legal Clinics received

47 **new cases and**

103 **new consultations during the year.**

More than **1100** people were trained during **24 workshops.**

Until the end of 2017, the Environmental Alert Platform published

96 **alerts and 884 milestones were generated.**

We presented the situation of Madre de Dios environmental defenders at an international event.

ENVIRONMENTAL JUSTICE

MARINE GOVERNANCE

Throughout this year, SPDA promoted discussions and debates on issues such as artisanal fishing, industrial fishing and protected species, through training courses, lectures and communication tools such as web sites (www.mardelperu.pe), multimedia and news reports.

Based on an extensive analysis to identify key actors of the different fisheries, assessing the policies and current legal context for their management, legal proposals and recommendations have been prepared to promote sustainable fisheries.

The SPDA Free Legal Clinic in Piura trained 15 authorities on matters related to the supervision and control of sustainable fishing and 57 artisanal fishermen from all the regions inlets (Máncora, Cabo Blanco, La Islilla, La Tortuga, El Ñuro, Sechura, Colán, among others), to improve their capacity to access environmental justice.

4 **legal proposals in relation to the protection** of whales, benthonic resources, illegal shipyards and stranding of sea lions in the Peruvian Sea.

45 **participants to the 1st Workshop** "Policies and legislation for fisheries management in Peru" in Lima and Piura.

150 **assistants at the lectures** "Perú Natural: Mar Peruano al 2012".

The Free Legal Clinic was installed in Piura. It received **12** **legal consultations and trained more than** **70** **individuals.**

MARINE GOVERNANCE

WATER GOVERNANCE

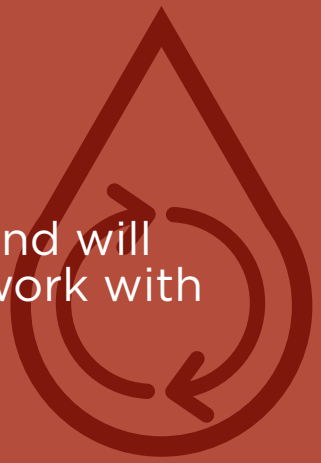
In 2017 SPDA formed the Invest Green Consortium together with Forest Trends, CONDESAN, EcoDecision and Imperial College London. This consortium will implement the Green Infrastructure Project for Water Security of the United States Agency for International Development.

The objective is to guarantee social, environmental and hydrobiological benefits, and attract new agricultural, industrial and hydroelectrical sectors to use this type of infrastructure.

The project has a duration of

05 years

and will work with



05 watersheds

watersheds at the national level.

PRO-JECTS 2017

ANNUAL REPORT
SPDA
2017

PARTNERS	PROJECT	OBJECTIVES	PERIOD
Andes Amazon Fund (AAF)	Strengthen governance, management and public support for the Peruvian system of protected areas. PHASE I, II and III.	Create enabling conditions to strengthen conservation systems in Peru; as well as provide legal and technical assistance to create new conservation areas in Peru.	June 2016 – July 2018
Gordon & Betty Moore Foundation	Strengthen the National System of Natural Protected Areas by the State (SINANPE) and provide tools for its sustainability and efficient management.	Promote and ensure biodiversity conservation and the management of Natural Protected Areas in the Amazon, consolidating financial sustainability tools, strengthening the fight against illegal activities in natural protected areas and capacities at the national and regional levels, in order to ensure the adequate management of natural protected areas.	July 2017 - June 2018
Gordon & Betty Moore Foundation	Conservation and consolidation of protected areas and indigenous territories within the Purús Manu mosaic.	Consolidate the management of natural protected areas and indigenous territories of the Alto Purús Mosaic, and improve the level of protection and conservation of indigenous peoples in isolation and initial contact by strengthening the capacities of those responsible for their administration, as well a normative framework to ensure adequate management.	November 2016 - January 2019
Gordon & Betty Moore Foundation	Reduce threats through the consolidation of regional environmental institutional frameworks and the participation of civil society in Madres de Dios.	The Project seeks to strengthen regional environmental institutional frameworks and empower both authorities and civil society of Madre de Dios for efficient environmental management through the protection and conservation of our natural resources.	November 2014 – June 2017

PARTNERS	PROJECT	OBJECTIVES	PERIOD
Gordon & Betty Moore Foundation	Strengthen the National System for Natural Protected Areas by the State (SINANPE) and consolidate regional conservation strategies of Loreto through the Government and Civil Society.	Ensure biodiversity conservation and management of Natural Protected Areas of the Peruvian Amazon, strengthening their National System for Protected Areas and consolidating regional institutionality in Loreto, as well as civil society.	July 2014 - June 2017
Ford Foundation	For solid and fair environmental public participation in the mining industry of Peru.	Contribute to strengthening environmental public participation tools during the execution of mining activities in the country.	July 2017 – September 2018
MacArthur Foundation	Answers to the growing loss of biodiversity due to productive activities in the Amazon by applying research, legal measures and incentives to mitigate tendencies in land use changes and deforestation.	Improve institutional and legal frameworks to undertake sustainable investments in Amazon areas that are suitable for agricultural and agroindustrial projects, related to the management of areas used for intensive agriculture or potentially affected by this type of agriculture and investments.	January 2016 – December 2018
Fundación Mar Adentro	Residencias Fundación Mar Adentro.	Support Peruvian artists selected by FMA to carry out an artistic intervention in the private conservation area Paraíso Natural Iwirati of the Puerto Prado Native Community, Peru.	March 2016 – August 2017
New England Biolabs Foundation - NEBF	Create Sustainable Conservation and Tourism Promoters to contribute to financial sustainability and the generational renewal of the Amazon Voluntary Conservation Network (RED AMA), Peru.	Support the Amazon Voluntary Conservation Network (RED AMA).	August 2017 – August 2018

PARTNERS	PROJECT	OBJECTIVES	PERIOD
Tides Foundation Patagonia	Do it for your wave – The conservation of spectacular surfing waves in Peru.	Elaboration of a documentary on the Do it for your Wave Initiative and replicate Do it for your Wave in Chile.	April 2017 – April 2018
Walton Foundation	Towards sustainable fishing in the first five nautical miles in Peru.	Provide the foundation and local members with the necessary legal information and policies to support the sustainable management of fisheries in Peru.	December 2016 – September 2017
Walton Foundation	Towards sustainable fishing in the first five nautical miles in Peru.	Promote reforms in the legal framework for fisheries in Peru in order to sustain management based on the rights to artisanal fishing, as well as formalize the artisanal fishermen.	October 2017
Amazon Conservation Association	Capacity building to monitor deforestation and forest governance in real time, to help meet the objectives of REED+ in the Peruvian Amazon.	Contribute to the implementation of REDD+ policies and the development of social and environmental practices by key actors of the private sector.	December 2016 – December 2020
Climate & Development Knowledge Network (CDKN)	Strategic regional communication.	Coordinate the CDKN communications strategy for Latin America.	May 2016 – June 2017
Critical Ecosystem Partnership Fund (CEPF)	Strengthening private and communal conservation in the Northeast Corridor of Conservation in Peru.	Contribute to biodiversity conservation in the Amazon Northeast Biodiversity Corridor, through a network of private conservation areas (PCAs) and reach financial sustainability.	July 2016 – June 2018

PARTNERS	PROJECT	OBJECTIVES	PERIOD
Environmental Defense Fund (EDF)	Analysis on the situation of policies and laws for sea fishing in Peru.	Elaborate a report on the state of ocean fisheries in Peru.	August 2016 – June 2017
Global Forest Watch / World Resource Institute	Use Global Forest Watch to improve responses to deforestation and wildfires in the context of private conservation in the Amazon, Peru.	Use the Global Forest Watch platform to support RED AMA in monitoring forests of PCAs in the Amazon, and design responses to deforestation in PCAs and the illegal fires.	June 2017 – March 2018
Rights Resources Group	Proposals to improve land ownership in the native and peasant communities of Peru.	Generate proposals and working spaces with the governing body and institutions involved, to clarify and simplify demarcation, formalization and land ownership procedures of peasant and native communities, by Regional Governments.	March 2016 – March 2017
Rights Resources (RRI)	Legal security for indigenous territories in Madre de Dios and Cusco in Peru.	Contribute to strengthen adequate management of natural resources and the capacities, to facilitate the exercise of collective rights of beneficiary communities.	October 2015 – March 2018
Oxfam América	Improving forest governance and access to environmental justice in Tamshiyacu.	Strengthen the capacities of local actors and their capacity to access environmental justice effectively in cases where their rights are being violated, and provide them with improved elements to communicate and disseminate the problems that afflict them.	November 2017 – April 2018

PARTNERS	PROJECT	OBJECTIVES	PERIOD
PROFONANPE	Mitigate deforestation in chestnut concessions in the Madre de Dios region.	Elaborate and put into place a local pilot system of control and supervision, including through a participative monitoring mechanism and early alert technological platform, for effective actions in the conservation of chestnut forests in the Alegría sector, Madre de Dios.	October 2016 – October 2017
The Ternure Facility (TF)	Land ownership of indigenous territories in Peru.	Ensure collective land ownership by strengthening institutional frameworks in terms of formalizing communal land. The intervention would provide legal certainty for 5 million communal hectares at the national level and 200 thousand hectares for indigenous territories of Loreto and Madre de Dios.	October 2017 – October 2019
International Unio for Conservation of Nature (IUCN)	Protecting the Guardians of Natural Patrimony: generating conditions to protect and safeguard the rights of park rangers and communal environmental defenders in Madre de Dios.	Support the defenders in order for them to conduct their work in a safe manner. This shall take place through information, offering security, training to protect themselves and promoting international recognition.	January 2017 – February 2019
Wildlife Conservation Strategy (WCS)	Capacity building and cooperation to fight illegal wildlife trafficking networks in Latin America and Southeast Asia.	Contribute to the capacity building of police and criminal justice officers related to wildlife illegal trafficking, contribute to improving transboundary investigations for the exchange of information, and design a pilot training program.	February 2016 – June 2017
US Fish and Wildlife Service	Fighting wildlife illegal trafficking in Peru, through the empowerment of local authorities, civil society and communities in Loreto, Amazonas, Ucayali and San Martín.	Reduce wildlife illegal trafficking by training regional authorities and a communication campaign at the local level.	September 2016 – December 2017
